this book comprises select proceedings of the 1st international conference on computational intelligence for engineering and management applications ciema 2022 this book emphasizes applications of computational intelligence including machine intelligence data analytics and optimization algorithms for solving fundamental and advanced engineering and management problems this book serves as a valuable resource for researchers industry professionals academicians and doctoral scholars in engineering production thermal materials design computer engineering natural sciences and management who work on computational intelligence the book also serves researchers who are willing to use computational intelligence algorithms in real time applications

smart forestry 5 0 for powered ai sustainable environment and climate explores the transformative potential of integrating advanced artificial intelligence ai technologies into forestry practices this book delves into how the fifth industrial revolution can reshape the way we manage forests promoting sustainability and resilience in the face of climate change it combines theoretical insights with practical applications providing a comprehensive guide for researchers practitioners and policymakers the book is structured around several key themes which includes foundations of smart forestry ai and data driven decision making innovative applications of ai ecosystem monitoring and restoration collaborative frameworks for sustainable practices ethical considerations in smart forestry future trends and innovations that highlight the intersection

of smart forestry and ai emphasizing sustainability in forest management it discusses innovative technologies and methodologies that enable efficient monitoring management and restoration of forest ecosystems

in the environment of energy systems the effective utilization of both conventional and renewable sources poses a major challenge the integration of microgrid systems crucial for harnessing energy from distributed sources demands intricate solutions due to the inherent intermittency of these sources academic scholars engaged in power system research find themselves at the forefront of addressing issues such as energy source estimation coordination in dynamic environments and the effective utilization of artificial intelligence ai techniques intelligent solutions for sustainable power grids focuses on emerging research areas this book addresses the uncertainty of renewable energy sources employs state of the art forecasting techniques and explores the application of ai techniques for enhanced power system operations from economic aspects to the digitalization of power systems the book provides a holistic approach tailored for undergraduate and postgraduate students as well as seasoned researchers it offers a roadmap to navigate the intricate landscape of modern power systems dive into a wealth of knowledge encompassing smart energy systems renewable energy integration stability analysis of microgrids power quality enhancement and much more this book is not just a guide it is the solution to the pressing challenges in the dynamic field of energy systems

this detailed volume explores recent developments in microfluidics technologies for cancer diagnosis and monitoring the book is divided into two sections that delve into techniques for liquid biopsy for cancer diagnosis and platforms for precision oncology or personalized medicine in order to create effective patient avatars for testing anti cancer drugs written for the highly successful methods in molecular biology series chapters include introductions to their respective

topics lists of the necessary materials and reagents step by step and readily reproducible laboratory protocols and tips on troubleshooting and avoiding known pitfalls authoritative and practical microfluidic systems for cancer diagnosis serves as an ideal guide that will be helpful to either replicate the construction of microfluidic devices specifically developed for cancer diagnosis or to catalyze development of new and better cancer diagnostic devices
